and Automotive Baden-Württemberg

Various forms of cooperation with outstanding partners!

e-mobil BW coordinates excellent clusters and initiatives and provides numerous opportunities for business cooperation and collaboration:

The **cluster electric mobility south-west** brings together around 200 companies and research institutes working on innovative, electric, and digital mobility solutions for the future.

The **cluster fuel cell BW** counts on about 200 companies and research institutes which are working on hydrogen and fuel cell as future key technology for the electrification of vehicle drive trains.

The goal of the **Plattform H2BW** is to focus the various competencies and hydrogen activities in Baden-Württemberg along the complete value chain.

The **Strategic Dialogue for the Automotive Sector** in Baden-Württemberg presents a new format of institutionalised collaboration in order to successfully shape the transformation process of Baden-Württemberg's economy.

Furthermore, e-mobil BW benefits from a broad international network of relevant players, clusters and networks in Europe, as well as in North America and Asia. With its global contacts, e-mobil BW supports Baden-Württemberg – and in particular small and medium-sized businesses – in becoming part of international knowledge flows and value chains.

State Agency for New Mobility Solutions
and Automotive Baden-Württemberg

Strengthen networks. Promote innovation.

The State Agency for New Mobility Solutions and Automotive, e-mobil BW, is the central agency for innovation in mobility of the German State of Baden-Württemberg. Together with partners from industry, universities and public institutions, e-mobil BW shapes the deep-going transformation process in mobility. Open to all kind of technologies, e-mobil BW GmbH acts as a driver in the industrialisation, market launch and application of sustainable, climate compatible and locally zero-emission mobility solutions in order to strengthen the state of Baden-Württemberg as as a hotspot for mobility, both in industry and science.
